Checklist

Print it, tick it off: can you explain each in one sentence?

- [ ] **1** **var vs let vs const** — TDZ and block scope
- [ ] **2** **== vs ===** — typeof null, NaN, coercion
- [ ] **3** **Truthy vs Falsy** — ?? vs || and ?.
- [ ] **4** **Scope & Hoisting** — hoisting and shadowing
- [ ] **5** **Closures** — live variables, private state
- [ ] **6** **this** — call, apply, bind
- [ ] **7** **Arrow vs Regular** — this and arguments
- [ ] **8** **Prototypes & Classes** — the chain, extends, #private
- [ ] **9** **Array Methods** — who mutates, sort, reduce
- [ ] **10** **Destructuring** — spread, rest, deep copy
- [ ] **11** **Event Loop** — microtasks before timers
- [ ] **12** **Promises** — then, catch, finally
- [ ] **13** **async / await** — await, errors, forEach trap
- [ ] **14** **Promise Combinators** — all, allSettled, race, any
